

Printers, & Inks Signage Imaging Media

SIM 2010 expo, Abu Dhabi

The report that you have downloaded was available last year. It addresses the wide-format inkjet printers, 3D printers (rapid prototypers), after-market inks, and RIP software that was exhibited at SIM expo in Abu Dhabi, U.A.E. in the last three days of November 2010.

This and other tradeshow reports of previous years are being moved to our new section for people who wish to ask questions directly and personally to Dr Hellmuth. You can receive all these reports when you either Subscribe, or sign up for consulting. Every year I make an effort to visit new parts of the world to learn more about wide-format inkjet printers, in order to maintain the report lists for the [distributors](#), [printshop owners and managers](#), and [manufacturers](#) who write us for either a Subscription or for Consulting Services.

If you wish a Subscription, please look at FLAAR-Reports.org and then contact us at FrontDesk "at" FLAAR.org.

If you wish consulting services, download the consulting PDFs on any Consulting page on any FLAAR web site, or write us at FrontDesk "at" FLAAR.org

The Abu Dhabi National Exhibition Centre is new, so very photogenic.

HP Designjet L25500 latex printer.

SIM 2010 expo lectures poster.

Caldera banner at Seiko booth.

Sam-Ink containers on display.
