Introduction

90% of the laminators sold in Europe and the Americas are now made in China. So it helps to see the original brands at APPPEXPO before you make a decision.

Most companies which sell wide-format inkjet printers make an issue by saying “you do not need a laminator if you buy our printer.” But this is not true in most cases. You still need a laminator. So we highly recommend attending APPPEXPO 2016 so you can learn about all the laminators (remember, about 90% are made in China…).

APPPEXPO 2016, 9 to 12 March 2016, National Exhibition & Convention Center (Shanghai), www.APPPEXPO.com.

FLAAR only attends trade shows which have either international significance or our the leading expo in their local area. APPPEXPO is both.

So if a FLAAR team is present, this is a clear indication that a trade show is worth attending.

And, if we send lots of team members, this is further indicate of the ranking of the expo. If there are four people from FLAAR at a single expo, this means it has 400% more to take notes on than an expo where only one of the team is present.

If there are more than four, that is a clear indicator of even higher international importance of this expo. But we only send four people to an expo if it is a world-class expo.
Laminators

Audley

- Hot&Cold / Model: ADL-1600H1
- Low Temp Cold Laminator / Model: ADL-1600C5+
- Hot Laminator / Model: ADL-1600/1700H5+

An ADL-1600H1 Hot&Cold Laminator

This is the ADL-1600C5+, a low temperature cold laminator.

- Hot&Cold Laminator / Model:SC-1700F1
Liquid Coaters

Coaters are to enhance the surface texture or surface appearance. Other coaters are to apply an entire coat (cheaper to “coat” than to “print” white or other such surface).

Most trade shows do not mention coaters; many people assume a coater is just a laminator. But in many instances a coater is different than a laminator.

CNC Reports

3D Reports

Media & Substrates Reports

Textile Reports

To ask to be invoiced, write email to FrontDesk “at” FLAAR. You can ask for a full year’s Subscription to Media & Substrates and 3D reports all year long (ISA, FESPA, etc).
This report has been licensed to Shanghai Modern International Exhibition Co., to distribute, since they are the organizers of APPPEXPO (Advertising, Print, Pack & Paper Expo), Shanghai. But this report has not been licensed to any printer manufacturer, distributor, dealer, sales rep, RIP company, media or ink company to distribute. So if you obtained this from any company, other than APPPEXPO, you have a pirated copy.

Also, since some reports are occasionally updated, if you got your version from somewhere else, it may be an obsolete edition. FLAAR reports are being updated all year long, and our comment on that product may have been revised positively or negatively as we learned more about the product form end users.

Please Note

To obtain a legitimate copy, which you know is the complete report with nothing erased or changed, and hence a report with all the original description of pros and cons, please obtain your original and full report straight from [www.large-format-printers.org](http://www.large-format-printers.org) or other web sites in our network such as [www.wide-format-printers.net](http://www.wide-format-printers.net).

Your only assurance that you have a complete and authentic evaluation which describes all aspects of the product under consideration, benefits as well as deficiencies, is to obtain these reports directly from FLAAR, via the various sites in our network.
