Three flavors: two exhibited at ISA sign expo 2011	9

Please Note

This report has not been licensed to any printer manufacturer, distributor, dealer, sales rep, RIP company, media or ink company to distribute. So if you obtained this from any company, you have a pirated copy.

Also, since this report is frequently updated, if you got your version from somewhere else, it may be an obsolete edition. FLAAR reports are being updated all year long, and our comment on that product may have been revised positively or negatively as we learned more about the product form end users.

To obtain a legitimate copy, which you know is the complete report with nothing erased or changed, and hence a report with all the original description of pros and cons, please obtain your original and full report straight from www.large-format-printers.org.

Your only assurance that you have a complete and authentic evaluation which describes all aspects of the product under consideration, benefits as well as deficiencies, is to obtain these reports directly from FLAAR, via www.wide-format-printers.NET.

We offered these reports on Jetbest magic ink for over a year. We really like innovative inks but it is precisely inks on the cutting edge which tend to have challenge in their chemistry and applications.

We have retired this PDF on Jetbest Magic ink until we can do site-visit case studies of end-users who can document how this ink functions out in the real world.

Plus since it is typical for innovative inks to need to have their chemistry tweaked, we would need to revisit Jetbest ink company to understand the current situation of their Magic ink.

These early reports on Jetbest inks can be purchased but realize that although the information was valid for the date written, we are now almost two years since the original Jetbest ink was formulated and the current report needs to be significantly updated.

Since there are so many other new inks, we tend to undertake reports when access to the factory and demo room is available.

Sample print with the Jetbest UV flatbed and the Alcotex Ink.

Some sample prints to show all that you can do with the AnyJet Ink of Jetbest.
