Starting in 2010 FLAAR began to develop the concept of product-specific guides to printer trade shows, in part because Chinese trade show exhibitor lists were a tangle to understand which products were where. At the Dubai sign and graphics expo, early 2011, we issued our first printed copy. By coincidence ISA subsequently asked us to prepare guides for their visitors, not knowing we already had initiated this concept ourselves earlier. So we issued a special version for their expo, and copyrighted that version (though we already had on record this concept from Dubai).

Even though FLAAR is obviously a web-based institute, we fully support trade shows. We recognize it is essential to have booths with pertinent products and for an expo to provide services above and beyond the normal lectures and vehicle wrap seminars.

Our map concept is intended to assist the visitors and organizers of SGIA both to attract more attendance and for all who do come, to make their visit easier to organize. Our goal is to increase satisfaction for those who attend trade shows.
